Business Made Easy
we'll show you how

Building Intelligent Spaces
with Digitally Enhanced Technology

Whether a building is owned by an organization or let by a property manager, the safety and security of it's assets and the user-experiences of people working within can be enhanced with the latest in ambient audio visual, automation, security and internal communication technologies.
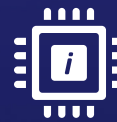

GCG Enterprise Solutions offers a range of useful, cutting-edge building systems that will revolutionize your modern office environment, making it both safer and smarter.

Extra Low Voltage Systems

Video Walls

Security System

BUILDING SYSTEMS 2.0

Extra Low Voltage Systems

An ELV electricity supply is in a range that is low enough it doesn't carry any high risk of electrical shock(s). These systems are extremely useful and cost effective for running an intelligent building. All the systems below are operated by low DC (direct current) voltage 12 VDC and 24 VDC.

Structured Cabling System

We're qualified to install or retro-fit a comprehensive cabling infrastructure to support all connectivity between communication, monitoring and remote-control devices.

Security System

We'll ensure full compliance when installing mandatory premises monitoring and security such as CCTV / Access Control / Intercom / Gate Barrier.

Satellite Master Antenna Television

As us about an off-grid satellite link for your residential building or villas.

Public Address & Music (perfect for schools)

We'll help you set the perfect ambiance and announce your good news to pupils or employees.

Master Clock System

For industries that require extremely high degrees of time accuracy, we'll install a master clock system that keeps time throughout the building.

Nurse Calling System

For any situation what requires communication to elicit an immediate response in an emergency or high pressure industry, we've got you covered.

Queuing Solution

We've installed this fool-proof ticketing system in banks, store help-desks and medical facilities countrywide.

Home Automation

Imagine complete control and awareness of every electrical and mechanical device in your home through a digital switch system.
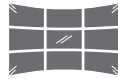

SEEING IS BELIEVING!

Audiovisual (AV) systems

From small meeting room presentations to entire conference halls, speaking via video link to a colleague in another part of the world is easy with a digital AV solution installed by our expert technicians. GCG technology allows you to enjoy close ups of the action on giant stadium screens, pursue studies via distance learning, or simply viewing an interactive video wall in an art gallery.

Video Walls

Our team will work with your desired outcome to place video walls where they'll have the biggest impact. We also have access to the world's slimmest and biggest VideoWalls.

Cinema Video System

We'll play the lead in delivering the most sophisticated graphics and sound reproduction to make you the star of the show with our "Cinema of the Future" LED Technology.

Multi-Purpose (LED) Signage

GCG 's customized LED signage supports your business's communication strategy. Stay current with world culture with instant, customized updates to target your audience more efficiently.

Conference Room

Our digital signage for corporate communications and conference rooms empowers you to create a corporate environment that energizes your employees to collaborate while your IT team controls the office signage from a central location.

Interactive Smart Boards

Get started with a digital whiteboard solution for your classroom or meeting room, complete with annotation, screen sharing, and cloud storage capabilities.

GCG Enterprise Solutions' wide range of interactive flat panel displays that are designed as an open platform with excellent collaborative capabilities, ideal for meetings and presentations in corporate or education environments.

The applications for learning, research and development are literally limitless.

We can make your building a great place to work and play.

BRINGING THE PEOPLE TOGETHER

Information Communication Technology (ICT)

The way our buildings 'communicate' has a big effect on the way we function and operate within them. GCG has the technology to install an infrastructure that not only makes working life easier for your employees, but improves their ability to be more productive at a lower cost.

IP Telephony

We'll link your whole organization and your suppliers, vendors and major clients to a call system working on voice data at a fraction of standard service provider charges.

Wi-Fi

Our team will boost access to every corner of your building with restricted Wi-Fi access under your complete control.

IP Tv

We can assist hotels, hospitals and hostels to benefit from limiting or assigning specific channels as per charge or legislation to individual televisions in the building.

Switches

Our qualified technicians are trained to overhaul entire legacy building switches for optimized connectivity to your network.

Data Centers

Offer tenants a centralized, shared IT operations and equipment facility to store, process, and disseminate critical data and applications for the whole building.
